Summary

Analytical and detail-oriented AI & Data Science student with hands-on experience in Python, SQL, Excel, and Power BI. Skilled in data analysis, dashboard development, KPI tracking, and extracting actionable business insights from complex datasets. Strong problem-solving, communication, and teamwork abilities with a keen interest in business strategy, growth analytics, and data-driven decision making.

Technical Skills

Programming:	Python, C
Databases:	MySQL (joins, aggregations, filtering, subqueries)
Data Analysis:	Data Cleaning, Exploratory Data Analysis (EDA), KPI Development, Feature Engineering
Visualization:	Power BI, DAX, Power Query, Excel
Libraries:	Pandas, NumPy, Matplotlib, Seaborn, Plotly
Tools:	Git, GitHub, Jupyter Notebook, VS Code

Core Strengths

Problem Solving	Analytical Thinking	Communication	Team Collaboration
Adaptability	Presentation Skills	Business Understanding	

Projects

1. Olist E-Commerce Data Analytics Project

Python, Pandas, Power BI

GitHub: github.com/Khyathiyadav

- Conducted end-to-end exploratory data analysis on Brazilian Olist E-Commerce datasets containing orders, customers, products, payments, and reviews.
- Performed data preprocessing, feature engineering, and dataset merging to analyze customer purchasing behavior, revenue trends, and delivery performance.
- Identified top-performing product categories, delayed deliveries, payment patterns, and customer satisfaction trends using Python-based analytics.
- Generated business insights through visualizations and KPI analysis to support operational efficiency and revenue growth strategies.

2. Customer Behavior Analysis Dashboard

Python, SQL, Power BI

GitHub: github.com/Khyathiyadav/Customer-Analysis

- Analyzed customer purchasing behavior and subscription patterns across 4K+ customer records.
- Built dashboards to track average purchase amount, customer engagement, sales by category, and demographic trends.
- Used SQL and Python for data extraction, preprocessing, and identifying revenue-driving customer segments.
- Delivered actionable insights to support customer retention strategies and business growth analysis.

3. Sales Performance Dashboard

Power BI, DAX, Excel

GitHub: github.com/Khyathiyadav/sales-performance-dashboard

- Developed an interactive sales dashboard to analyze revenue trends, customer growth, and regional sales performance.
- Tracked key business KPIs including \$22M+ total revenue, YoY growth, sales distribution, and product category performance.
- Automated reporting and business monitoring using DAX measures and Power BI visualizations.
- Supported strategic business analysis through data storytelling and trend-based insights.

Education

Indian Institute of Information Technology, Sri City

CGPA: 6.33

B.Tech in Artificial Intelligence and Data Science
